

Quick-change tooling system

Alpha 355 / 355 S

Mode of operation

The swiveling quick-change tooling system is firmly attached to the machine, allowing terminal feed rolls and crimping tools to be prepared for the next job while the machine is running.

Changeover time from one terminal to the other is considerably reduced and productivity increases.

Technical data

Area of application	Alpha 355 / 355S and Alpha 433 (on request)
---------------------	--

Your benefits

- Tools and terminal feed rolls can be prepared while the machine is running.
- Changeover time greatly reduced
- Daily productivity increased
- Firmly attached to machine
